Aqualok Infuse

The Aqualok Infuse features a fantastic infuser lid that allows you to add and lock in your favourite fruits or vegetables to your daily drinking water. Just like our standard Aqualok model, the Aqualok Infuse is made from the durable translucent Tritan[™] plastic and also features a secure-lock lid to prevent any unwanted spillages. There are enlarged branding areas on two sides of the bottle and also around the lid, which is a popular branding area to print with bespoke names via our Individual Naming service.
